

*Ephemerides with
K. printing*
Riders : 1663.

Brittish Merlin.

Bedeckt with many delightful varieties and useful verities, fitting the longitude and latitude of all capacities within the Islands of *Great Brittain*s Monarchy, and Chronological Observations of principal note, to this year 1663.

With Notes of Husbandry, Phisick, Fairs and Marts, directions and Tables to all necessary uses.

Made and compiled for the benefit of his Countrey, By Schardanus Riders.

L O N D O N,
Printed by Will. Leybourn,
for the Company of Stationers.

Profitable Observations and Notes.

ALL Measures of Longitude are deduced from barley corns; as three barley corns make an inch, twelve inches one foot, three foot one yard, five yards and a half one statute pole, or perch, fourty peaches make a furlong, eight furlongs make one English mile, in a mile are eight thousand three hundred and twenty peaches or poles, fifty six paces, ells one thousand four hundred and eight, yards one thousand seven hundred and sixty, feet five thousand two hundred and eighty, inches sixty three thousand three hundred and sixty, and barley corns one hundred ninety thousand and eighty.

The Circumference of the Earth and sea joyntly is 25 036 miles, and the Diameter 7966 miles, and its semidiameter 3983 miles, according to English mensuration.

The Dimensions of England and the adjacent Islands.

THE length of England from South to North is 386 miles, the broadest place from the Lands-end to Sandwich is 279 miles, the next broadest place, which is between Davids and Yarmouth in the East is 240 miles, the whole compass of England is 1532 miles.

The length of Ireland north and south is 303 miles, the greatest breadth thereof East and West is 113 miles, the whole compass of the main Land is 948 miles.

The greatest length of Scotland south and north is 480 miles, and the breadth East and West is 165 miles, the whole compass 1100 miles.

The Isle of Man is in length 28 m. in breadth 18 miles; and in compass 91 miles.

The Isle of Anglesey is in length 21 miles, in breadth 18 miles, in compass 85 miles.

The Isle of Wight is in length 22 miles, in breadth 11 miles, in compass 57 miles.

The Isle of Guernsey is in length 13 miles, in breadth 9 miles, the whole Circumference is 36 miles.

The Isle of Jersey is in length 10 miles in breadth 6 miles; the Compass 28 miles.

A Geographical description of the world containing *Europe, Asia, Africa, and America.*

Europe contains in it these Provinces, *Germany, Swedeland, Denmark, Italy, Muscovia, Hungaria, France, Polonia, Sclavonia, Norway, Grecia*, the most eminent Islands are these, *England, Ierland, Sardinia, Candia, Scotland, Sicilia, Negropont, and Corsica.*

The greatest length of this part of the World is 3000 miles, the breadth 900.

Asia the biggest of the four, and first known part of the World contains these principal Regions and Islands, viz. *Armenia, Anatolia, Persia, Assyria, China, Syria, Arabia, Mesopotamia, India, Parthia, Medea, Palestine, Chaldaea, Tartaria.*

In *Africa* are these Provinces, viz. *Egypt, Barbary, Ethiopia, Nubia, Abassines, Alonomotopa, Lybia, The Islands, Magdagerde, St. Thomas, Insula de Cape Verde, Insula de Rannaria, Insula de Madera.*

America the fourth part of the World, and of the latest discovery consisteth of these two parts, *Mexicana, and Peruana.*

The Provinces of *Mexicana*, are *Nova Hispania, Terra florida, Nova Alboina, Caluformia, Norimbega, Nova Francia, Estotiland*, the chiefe Islands of *Mexicana* are *Greenland, Iseland, and Friesland.*

The Provinces of *Peruana* are *Brasil, Pisinida Caibana, Peru, Cartagen, Chila, Charon, Chica, Patagoros.*

The chief Islands of *Peruana* are *Hispaniola, Cuba, Iamaica, and many others.*

50			0 5 0	0 15 0	1 10 0	2 5 0	3 0 0
60			0 6 0	0 18 0	1 16 0	2 14 0	3 12 0
70			0 7 0	1 1 0	2 2 0	3 3 0	4 4 0
80			0 8 0	1 4 0	2 8 0	3 12 0	4 16 0
90			0 9 0	1 7 0	2 14 0	4 1 0	5 8 0
100			0 10 0	1 10 0	3 0 0	4 10 0	6 0 0

The use of this Table is this, If thou wouldst know what the Interest of one hundred and five pounds is for 9 Moneths at 6 per cent. then in the first column find out 100 at the foot of the column, & right against it, under the Title 9mo. (which is the fifth column,) there you shall find 4l. 10s. and against the number 5 l. you shall find 4s. 6 d. so that the Interest of 105 l. for 9 months, cometh to 4 l. 14 s. 6 d. the like of all the rest

This is the season for good husbands to lop and prune superfluous branches from fruit trees, uncover their roots, set all kind of quicksets and fruit trees in the new of the Moon, be sure the wind be not North nor East, and set the same sides to the South and West, which grew at the first, set beans, pease, and parsnips the weather mild and Moon decreasing, dig gardens, drench weak and sick Cattle, kine, with Uerjuice, Hozles with water and ground Hail, sodden with a little bran.

The best phisick is warm clothes, good fires, warm diet, and a merry honest wife.

February hath xxviii. daies.

This moneth let, cut, and lay
 Quicksets and Holes, as all
 other plants, set and plant
 Vines, Hops, and all fruit
 that grows on bushes: Sow
 pease, beans, and onions, fur-
 nish your gardens with sallads
 and potherbs for Summer;
 prune and trim all sorts of
 fruit trees from Horse, Can-
 kor, and superfluous branches,
 remove grafts of young trees,
 in the last quarter, the Moon
 being in Aries, Libra, or Scor-
 pio.

If necessity urge, you may let
 blood, but be sparing in Phleick,
 and be sure when a warm day
 comes, to prevent taking of cold
 through carelessestie, for the
 warm air this moneth is not la-
 sting, but oft deceives us to our
 prejudice.

March hath xxxi. daies.

Now regarding the
wind and weather, graft,
cut quicksets, cover the
roots of fruit trees (open-
ed in December and Janua-
ry) with fat earth, sow
Oats, Barley, Parsnips,
Onions, Carrots, Mel-
lons, Cucumbers, and
all kind of Potherbs, Hip
Purtychokes and Sage,
and sow all manner of
garden seeds.

Now advise with the ho-
nest and able Astrological
Physicians; 'tis good to purge
and let blood.

Aprill hath xxx. daies.

This moneth sow hemp
 and flax, pole hops, set and
 sow all kinds of Garden
 Herbs; Restoze the liber-
 ty of the laborious Bee,
 by opening her Hive:
 Bark Trees for Tanners,
 and let good Huswives
 mind their Gardens, and
 begin to think of their
 Daries.

*In gardening never this rule forget,
 To some dry, and set wet.*

The use of Phisick becomes
 now seasonable, as also pur-
 ging and blood-letting, 'tis
 good to abstain from wine,
 for many diseases will be ta-
 ken thereby, to the ruin of
 many

This moneth commands
 the provident Housewife, and
 the prudent Drist, to set their
 Stills on work, in the begin-
 ning of the moneth to see & see
 those tender summer herbs that
 would not indure the former
 cold, weed your hopgardens,
 cut off superfluous branches,
 mosses, &c, and gardens, and
 weed cozne.

Now every garden and hedge
 affords thee food and phisick,
 Rise early, walk the fields by
 running streams, the North and
 West sides, sage and sweet bur-
 ter an excellent breakfast, clari-
 fied whay with sage, scurvy grass
 ale and wormwood beer are hol-
 some Drinks.

At the Full of the Moon
this moneth and next, Ga-
ther your herbs to keep dry
for the whole year, set
Rosemary and Gilliflow-
ers, some Lettice and Ra-
dish three or four dayes af-
ter the full, and they will
not run to seed: shear your
sheep the Moon increasing

Let honest moderate la-
bour and exercise procure
your sweat, thin and light di-
et, and chaste thoughts, tend
to health: Lie not unadvi-
sedly on the ground, or over
hastily drink.

and Gall, to strew on your
 floors to destroy fleas, at
 the full Moon gather flow-
 ers and seeds, dry your
 flowers rather in the shade
 than in the Sun, which
 too much exhaleth their
 vertue, but to avoid cor-
 ruption, let the Sun's
 heat a little bitt them.

Beware of violent heat,
 and sudden cold, which are
 the great distempers of this
 moneth, and produce pesti-
 lential diseases, forbear su-
 perfluous drinking, but eat
 heartily.

Now with thankful
 nee reape your desired har-
 best. Sow Winter Herbs
 in the new of the moon.
 Esteem fair weather as
 precious, and mispend it
 not. Gather Garden seeds
 near the Full; Use mode-
 rate diet, forbear to slee
 presently after meat: take
 heed of sudden cold after
 heat.

Beware of Phisick and
 bloud-letting in the Dog-
 dayes, if the aire be hot,
 otherwise, if occasion re-
 quire, you may safely make
 use thereof.

September hath xxx. daies.

The beginning of this month and the end of the former, gather hops, their collection being broken, and the weather fair, and no dew on the ground, Still Vases make Merjuice, remove and set all slips of flowers, between the two Lady dayes, remove trees from September till February; especially in the new of the moon, the weather warm, and the wind South or West cut quicksets, gather ripe fruits: Sow wheat and Rye, winter Parsnips and Carrots; and set Roses, Strawberries and Barbaries.

Now as the year declines, provide your winter garments, hang them on loosely to prevent that you might after repent of, good for Phisick and Phlebotomy.

Observations on October.

Full moon the 6 day, at 8 at night.
 Last quart. the 13 day, half an hour past noon
 New moon the 20 day, neer midnight.
 First quart. the 29 day, a quart past 3 morning

D. ○ R. ○ S. Sow Wheat and Rye, re-
 move young plants and trees
 about the New Moon, obser-
 ving this as a seasonable se-
 cret, that in setting you care-
 fully place that side to the
 South and West, which were
 so before you took up the plant,
 otherwise the cold kills it:
 gather your remaining Win-
 ter fruit, set all kinds of Nuts
 and Acorns, and cut Rose-
 trees but once in two years, if
 you intend to have store of
 Roses.

The garments you last moneth
 hang on your backs in Jest, now
 button them close in good ear-
 nest; cloath you now for pre-
 vention, for the cold comes in-
 sensibly, and fogs oft times be-
 get a whole Winters cold. Con-
 sult with your Tailors as well as
 Physicians.

Graft on, in the old of the
Moon. set pease and beans,
and some parsnips and car-
rots : Trench gardens
with dung , uncover the
roots of your apple trees,
and so let them remain till
March, kill swine in or near
the full of the Moon, and
the flesh will the better
probe in boiling.

The best phisick this
 moneth , is good exercise,
 warmth, and wholsome meat
 and drink.

In the last quarter of the C this month and the next, are the best times to fell Timber: Let Fowlers mind their Gamz. Cover all your best flowers and herbs from cold & frozms with rotten horse-dung look well to thy Cattle, blood horses. Let a warm fire and a cup of Rectar be thy each, the Kitchin thy Apothecaries shop, hot meats and broths thy physick, and a well spread table the proof of thy charity to thy poor neighbours, to whom this advice is seasonable.

If thou be poor, and canst not feast at all.
Thank God for such, as thee to feasting call.

The best Physick is as before, a merry honest heart, and the exercise of charity among thy poor neighbours.

A Description of the 4 quarters of the year.

The Spring begins March at high noon, at which time the Sun entereth the Equinoctial sign Aries, causing an Equality of day and night all the habitable world over.

Summer takes beginning June 11. about 3 in the afternoon; the Sun then approaching our Zenith, makes longest dayes and shortest nights on this side the Equator.

Autumn, or Harvest quarter begins, the sun entering the first scruple of Libra, which this year is the 13 of September at 6 in the morning, equalizing again day and night.

Winter begins December 11 half an hour past 5 afternoon, the sun then entering the Tropical sign Capricorn, making then the shortest day and longest night in the year to all on this side the Equator, as also the longest day and shortest night to them who inhabit the south-tract of the Line.

Of Eclipses happening this present year, 1663.

THere will be, four Eclipses this year, viz. two of the sun and two of the Moon, onely those of the Moon will be visible both to us, not any of the sun, therefore of them I shall be silent.

The first of the Moon will be on Thursday morning the 12 of February, the beginning will be half an hour past one in the morning, the middle of the Eclipse almost a quarter past 5. the end at three quarters past four in the morning, the whole Duration will be three Hours and almost a quarter, almost ten parts of twelve will be darkned, this will be seen to early risers.

The second of the Moon is on Saturday August the 8th. in the evening, this will be a totall Eclipse in England, the beginning will be at 23 min. past 6 at night, before her rising, the middle of the Eclipse half a quarter past eight, the end three quarters past nine, the whole Duration will be three Hours and a half, she will begin to be totally dark, fifty minutes past seven, and so continue till almost half an hour after eight.

R I D E R, 1663.

The uſe of this Table, with a Caution.

Do but obſerve in the fifth Column of the Almanack the hours and minutes of full-Sea at London bridge over againſt each ſeveral day of the Moneth, to -r from which time there noted, add or ſubſtract ſuch hours and minutes as this Table above doth appoint, and the total of the one, or remainder of the other ſhall be the time of the full-Sea at any of theſe places aboveſaid, ſalved the Anticipation or protraction of time, which by the winds, Land-floods, or Moons latitude may be cauſed, which may be an hour, or ſometimes more or leſs error, according to their ſite and quantity; a thing very remarkable of Sea-men when they paſs by any Sands, over any barr or haven, or ſuch like.
